This United States sing boat A. E. Woodraff arrived at Mayswithe on Saturday and on Sunday was valied by a large number of the people of this city. They were courteously received by Captain W. H. Christian and clerk F. M. Aolbird, and shown over the boat. The Woodraff has been working for several weeks past between Cincinnati and Catlettaburg and has removed many dangerous obstructions to navigation. One hundred and four snags in all have been taken out of the channel. The last one, a log measuring forty-dive feet in length, was removed at the lower grade on Saturday. Two others were taken out in front of the fifth ward. Two large and dangerous snags were removed from Isaac Creek, below Manchester. The steamer Telegraph had some of the timbers of her hull broken not long ago by one of these obstructions. The river is now comparatively free of snags from Cattlettsburg to Cincinnat.

Out tharming Countrywomen, are winning an enviable distinction for their fine teeth. This, they in great measure owe to the beautifying and restorative influence of Soxodont. the most popular preparation for the teeth on this continent. It removes from the deutal surface every impurity, checks decay and enables the teeth to masticate without contaminating the food, thus indirectly contributing to healthful nutrition, It effectually neutralizes an unpleasant odor of the breath.

Arademy of the Visitation.

Stulies will be resumed on Monday morating, September lat, at the Academy of the Visitation. Mayeville, Ky. We have noticed with pleasure the flourishing condition of this elegant institution, and we healtate not, to say that it ranks amone the most thorough and best disciplined in our Republic. Among the many notably praise-worthy features in this institution, that of vicilance over those intrusted to the sisters' sure ranks flest, no pupil being allowed to believe the Academy during school hours without presenting a written request from parent or guardien. Day pupils, who on account of living at a distance are necessitated to bring their dinners, are not peror unarlim. Day pupils, who on account of living at a distance are necessitated to bring their dinners, are not permitted to leave the Academy at noon, consequently their parents may be assured that their daughters are not exposed to the noon-day sun or the inclemencies of the weather. We also learned, that at no time during the day or night, are the papils from under the watchild eyes of the cool sisters. As to the course of instruction in every department, it could not be surpassed, and one very superior advantage is that only sickness or death necessitates a clauge of teacher. Each sister carries her class through the enlire course, and graduating honors are conferred on those only who have thoroughly completed the prescribed course of studies. We hope the institution may continue to prosper and thus add an increased linker to our social circle.
